

eFlash: Contractual Information for Partners

Phase-out | OmniVista Cirrus 4

EF-Phase-out-N306-EN – April 30, 2026

Effective date: July 31, 2026

Making way for the next generation: OmniVista Cirrus 10

Alcatel-Lucent Enterprise is pleased to announce the next step in the evolution of our cloud network management portfolio. Alcatel-Lucent OmniVista® Cirrus 4 will evolve into OmniVista Cirrus 10, our next-generation platform delivering superior functionality, stronger performance and a scalable foundation for future innovation.

With OmniVista Cirrus 10, partners can offer their customers more advanced, more secure and more efficient network management fully aligned with evolving enterprise needs. Accordingly, End-of-Sales (EoS) for OmniVista Cirrus 4 will take effect on July 31, 2026. This transition reflects ALE's ongoing commitment to innovation and to delivering enhanced value for our partners and their customers.

This eFlash is applicable in all countries worldwide except in territories where restricted by applicable export control rules.

What is being phased out?

This eFlash announces the End-of-Sales (EoS) of the Alcatel-Lucent OmniVista® Cirrus 4 solution, **effective July 31, 2026**, with End-of-Life (EoL) scheduled for **July 31, 2031**.

The OmniVista Cirrus 4 Network Management solution, together with its associated device support (Business and Premium bundles), will continue to be fully supported for customers holding a valid subscription license up to the EoL date.

After the EoS date, the creation of new organizations or tenants will no longer be possible. Existing customers, however, will continue to benefit from license renewals and add-ons within the ordering windows defined below:

- OV Cirrus 4.x 3-year and 5-year term licenses, **orderable until July 31, 2026**
- Network as a Service (NaaS) OV Cirrus 4.x 1-month term licenses and OV Cirrus 4.x 1-year term licenses (including renewals and add-ons), **orderable until July 31, 2030**

Customers holding inactivated licenses are strongly encouraged to activate them as soon as possible to maximize their subscription coverage before EoL. All support for OmniVista Cirrus 4 will **end after July 31, 2031**, regardless of activation status.

We invite customers to join the migration program to OmniVista Cirrus 10, the next-generation platform, to benefit from ongoing innovation, enhanced capabilities and long-term support.

Geographic applicability

This eFlash is applicable in all countries worldwide except in territories where restricted by applicable export control rules.

For more details, please refer to the updated [“Country List Availability for Network Cloud Application”](#) document published in MyPortal.

Alternative product offer

OmniVista Cirrus 10 represents a significant evolution toward a modern, scalable and intelligent network management platform. It introduces a unified architecture across LAN, WLAN and emerging services, delivering enhanced capabilities in security, network performance (including IPv6 readiness) and operational visibility.

The platform also strengthens analytics with Quality of Experience (QoE) network insights and detailed client insights, while introducing early AI-driven capabilities to enable more proactive monitoring and streamlined operations. With increased scalability and flexible deployment options, OmniVista Cirrus 10 is designed to efficiently manage large, distributed environments.

Looking ahead, upcoming OmniVista Cirrus 10 releases will introduce fully integrated AI capabilities, expanded telemetry use cases and enhanced service management features, including voice and edge services, further advancing automation and cross-domain orchestration.

Migration tool availability: Migration from OmniVista 4 to OmniVista 10 is supported through structured migration process and a dedicated tool, allowing partners to transition configurations and services with minimal disruption while benefiting from the enhanced architecture and feature set of the new platform.

Resources

All OmniVista Cirrus 10 available resources are available in MyPortal and on the ALE public website:

Q & A

Q: What is the final date for ordering?

A: Final orders for the phased-out model numbers listed above—covering both 3-year and 5-year terms—will be accepted through **July 31, 2026**. Final orders for 1-year license renewals and add-ons will be accepted through **July 31, 2030**.

Q: I have an active subscription; how long will it remain active?

A: ALE will provide support until the subscription expires or until the OmniVista Cirrus 4 EoL date of **July 31, 2031**, whichever comes earlier.

Q: I have an OmniVista 4 Business or Premium bundle that includes support for the managed device. When does device support end?

A: Device support will remain in effect until the earliest of the following three dates: the subscription expiration date, the OmniVista Cirrus 4 EoL date of **July 31, 2031** or the managed device's own EoL date.

Q: When can migration to OmniVista Cirrus 10 start?

A: Migration to the new OmniVista generation can begin in early June 2026, supported by a migration program and a dedicated migration tool available with the OmniVista 4.9 R3 release.

Q: Does this phase-out apply to NaaS subscriptions?

A: Yes, for new projects. For existing projects, renewals and add-ons continue to be supported.

For your convenience, this eFlash will be available in French, German and Spanish in MyPortal a few days after publication in English. If there is a discrepancy between the English version and a translated version, the English version shall prevail.
